PROFESSIONAL SUMMARY

Product marketing strategist with an MS in Data Science & Artificial Intelligence and experience shaping GTM strategy for complex product portfolios in regulated healthcare and fintech. Brings a rare mix of market strategy, technical fluency, customer insight, and cross-functional launch experience, translating technical products into messaging, campaigns, and sales tools that turn complexity into a competitive advantage.

PROFESSIONAL EXPERIENCE

Product Marketing Strategist

February 2024 – Present

Blue Cross and Blue Shield of Kansas | Remote

- Delivered a record 54,956 new Medicare members across all lines of business in the 2026 Annual Enrollment Period (AEP), a 27% increase over the prior year's 43,250, through an integrated campaign spanning digital, member, broker, and field channels.
- Rebuilt a retention program for group plan members transitioning into Medicare, increasing conversion from 22% to 35%.
- Developed segmented campaign messaging for five distinct audiences (New to Medicare, group plan Medicare transition, Medicare Advantage, Medicare Supplement, and retention), translating complex plan details into clear narratives across web, print, broker, and member channels.
- Cut review-to-launch turnaround from 14 to 10 days by standardizing proof deadlines, centralizing reviewer communication, and clarifying expectations across Compliance, Product, Sales, Operations, and CX.
- Built a broker enablement library for a 1,500+ broker network, including plan explainers, pitch decks, objection guides, co-branded portal assets, and enrollment kits designed to simplify Medicare decisions at the point of sale.

Product Marketing Coordinator

May 2022 – May 2023

Mekorma | Remote

- Increased marketing-sourced demo requests by 20% by improving website conversion paths and launching targeted LinkedIn campaigns to finance decision-makers.
- Optimized landing pages and product pages using Google Analytics, Microsoft Clarity, and HubSpot, improving conversion rates by 30% across key entry points.
- Led partner marketing initiatives, including a co-marketing program with Binary Stream to promote secure check-signing automation for Microsoft Dynamics 365 Business Central users.
- Drove GTM launches for Acumatica Electronic Signatures and Vendor Validation, developing positioning, launch assets, and quarterly webinar programming for finance and AP audiences.

Marketing Coordinator

July 2021 – May 2022

Cohen-Esrey | Merriam, KS

- Adapted brand messaging, campaign priorities, and leasing materials across 80+ markets, helping property teams maintain an average 95% occupancy portfolio-wide.
- Analyzed segmented performance trends to surface underperforming markets and deliver actionable recommendations on messaging, creative, and channel mix.
- Managed cross-functional campaign production across property managers, operations, and creative partners, consistently delivering on deadline.

Solutions Specialist

May 2017 – July 2021

Verizon | Blue Springs, MO

- Guided customers through complex device and plan decisions, translating technical features into practical buying guidance that drove purchase confidence and upgrades.
- Leveraged Salesforce CRM and Voice of Customer insights to identify retention risks, manage objections, and support proactive outreach.

EDUCATION

Master of Science in Data Science & Artificial Intelligence

August 2024 – May 2026

University of Central Missouri

- Graduate study in machine learning, deep learning, natural language processing, big data analytics, and data visualization, with emphasis on applying AI and data-driven decision making to real-world business challenges.
- Completed hands-on projects using Python, scikit-learn, TensorFlow/PyTorch, NLP workflows, model evaluation, and LLM-assisted application design.

Bachelor of Science in Business Administration – Marketing

August 2014 – May 2021

Park University

- Undergraduate study covering core marketing principles, consumer behavior, advertising strategy, digital marketing, and data-driven decision making through applied research and hands-on projects.
- Developed practical skills in graphic design, advertising production, and emerging digital marketing technologies including database marketing, multimedia, and interactive telecommunications.

CERTIFICATIONS

AI Fluency: Framework & Foundations

March 2026

Anthropic | Credential ID: inx7zr92ooq

Building with the Claude API

May 2026

Anthropic | Credential ID: 8zrt5r5pisqy

APPLIED AI & TECHNICAL PROJECTS

FoilStack | React Native, Expo, Supabase, TCGPlayer API

Trading Card Collection App (In Development)

- Building a mobile trading card collection app with a Robinhood-style portfolio UI, real-time market price tracking via TCGPlayer API, and AI-assisted card grading as the anchor premium feature.
- Architecting the data layer using Supabase (PostgreSQL) with TCGPlayer API integration for card metadata, live pricing, and set-level market data across Pokémon and other TCG formats.
- Designing the AI grading pipeline using computer vision to assess card condition, targeting the gap between manual grading and professional grading services.

Steam Backlog & Goals Tracker | Python, Llama 3, MongoDB, GraphQL, Streamlit

AI Product Prototype

- Built an AI-powered prototype that converts natural-language user goals into structured Steam game recommendations using player library data, game metadata, and achievement history.
- Designed a natural-language-to-database workflow using Llama 3, few-shot prompting, and MongoDB aggregation pipelines to translate ambiguous user intent into executable queries.
- Created a GraphQL API and Streamlit interface supporting multi-turn user flows, structured recommendations, and guardrails designed to reduce hallucinated outputs.

NLP & Machine Learning | Python, scikit-learn, TensorFlow/PyTorch, Transformers

Graduate Research Portfolio

- Built NLP and classification workflows covering tokenization, n-gram language modeling, add-k smoothing, perplexity analysis, Naive Bayes, Logistic Regression, and confusion matrix analysis.
- Implemented character-level recurrent language modeling, a mini Transformer encoder, and scaled dot-product attention to develop a working understanding of how modern language models process sequence data.
